Fax: (0161) 681 8590
Email: contact@smrchs.com

Dear Candidate,

Thank you for your interest in the Science teacher position at St. Matthew's High School. This is a very exciting time to join St Matthew's High School. In September 2017, we celebrate our 40th anniversary, a new teaching block will be opened and the facilities in science will be enhanced with a new laboratory and prep room.

There have been significant and sustained improvements this year in the support for teaching and learning with the appointment of experienced and innovative teachers as lead practitioners in a number of departments including science.

The Science department is a close knit and supportive department who make a significant contribution to the wider life of the school. GCSE A*- C pass rates for science have been above national levels for a number of years. This would be an ideal role for a promising NQT / RQT who is looking for solid support from a successful Department or a more experienced teacher that is looking for new opportunities to work towards a leadership role.

We are sure that you would see this for yourself, if you would like to visit the school informally and meet some of our team, please call Anna Espley (Headteacher's PA) on 0161 6816178 to arrange this.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Kevin Hogan'.

Mr K. Hogan
Headteacher
