

How can I help my child's reading skills?

You can read English texts aloud with your child at home or listen to audio-books but it is also important to read books in your home language.

Whether you're reading in English or in your home language, ask your child questions such as:

- What picture does this create in your mind?
- What do you think the character is thinking/feeling here?
- What do you predict will happen next?
- Have you ever experienced this?
- Which words are new to you? Can we work out what it means together?
- In what ways is this similar to (other book)?
